

DHRUV GUPTA

AI/ML Engineer | Computer Vision | NLP | Full-Stack AI Systems
dhruvgupta135790@gmail.com | +91 8852021323 | Alwar, Rajasthan | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

AI/ML Engineer pursuing B.Tech in Computer Science (AI/ML) with hands-on experience building machine learning, deep learning, and real-time production systems. Proficient in Python, FastAPI, TensorFlow, and PyTorch. Specialized in Computer Vision, NLP, and privacy-first on-device AI architectures. Demonstrated ability to deliver end-to-end AI solutions from model development to REST API deployment.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, HTML, CSS

AI/ML Frameworks: TensorFlow, PyTorch, scikit-learn, MediaPipe, MobileNetV2

ML Domains: Machine Learning, Deep Learning, Natural Language Processing (NLP), Computer Vision

Libraries & Tools: Pandas, NumPy, FastAPI, REST APIs, Git, GitHub, VS Code, Jupyter Notebook, Google Colab, Power BI

Databases: MySQL, SQL

PROJECTS

Finex AI — *Privacy-First Financial Assistant | Production*

- Built on-device AI assistant with 100% local browser processing — zero cloud dependency, ensuring complete data privacy
- Eliminated data leakage through client-side inference architecture and real-time financial insights engine
- Optimized for fast, low-latency performance without compromising model accuracy or user experience

HireAgain — *Uber-Style Worker Booking Platform*

- Developed a marketplace platform enabling users to discover and book verified local workers (electricians, plumbers, etc.) in real time
- Implemented worker profile system with skill listings, availability, and ratings — similar to Uber's driver model
- Built job request and acceptance flow allowing workers to view, accept, or decline incoming booking requests
- Designed end-to-end matching engine connecting service seekers with the nearest available skilled workers

HPCL Lead Intelligence Agent — *AI-Powered Business Automation*

- Developed an AI backend agent for lead management with real-time notifications and intelligent decision-making
- Implemented automated lead prioritization and routing system to optimize sales team workflows

ATM Fraud Detection System — *ML-Based Real-Time Fraud Prevention*

- Built ML classification model using Python & scikit-learn to detect fraudulent ATM transactions with high accuracy
- Developed FastAPI backend for real-time prediction with transaction pattern analysis

WORK EXPERIENCE

Data Science Trainee

Aug 2024 – Present We RNS IT Solutions, Alwar

- Performed end-to-end data preprocessing, exploratory analysis, and visualization for business intelligence reporting
- Built and evaluated machine learning models to derive actionable insights and support data-driven decision-making

CERTIFICATES

• Selected participant in IIT Roorkee Hackathon, where I worked on developing innovative AI/ML solutions under a competitive and fast-paced environment.

EDUCATION

B.Tech – Computer Science & Engineering (AI/ML)

2024 – 2028

University of Technology, Jaipur

Class XII – CBSE

2024

Class X – CBSE

2022
